

## Who Lent Bose An Ear When They Wanted Better Sound?

ST with Systems-on-Silicon.

When the Bose® Corporation wanted sound technology for their next generation Acoustimass® speaker system, STMicroelectronics listened.

The result? Virtually Invisible® stereo speakers with spacious sound and space-saving design. All thanks to ST's advanced chip-set technology, leading-edge manufacturing capability and world-wide distribution channels.

If you've got an application that needs fine tuning, ask ST to be part of the solution. You'll like what you see. And hear.
